# 1514456 - Value based commitment functionality at PM / PS interface

Component: MM-SRV-GF-CO (Commitment), Version: 2, Released On: 13.10.2020

## Symptom

Purchase requisitions which were created automatically from PM  or PS orders can NOT reduce their commitment values by several purchase orders as the value based commitment functionality is not available for them. In table EBAN  the indicator for Value-Based Commitment Reduction for Service Purchase Requisitions (field WRTKZ) remains empty even if the value based commitment reduction functionality for service purchase requisitions was activated in the customizing.

## Environment

- Materials Management (MM)
- SAP ERP Central Component
- SAP ERP
- SAP enhancement package for SAP ERP
- SAP enhancement package for SAP ERP, version for SAP HANA
- SAP S/4HANA

## Cause

For service purchase requisition items coming from PM or PS only 1 purchase order item can be created each. In other words one service
requisition item must be always closed by one service puchase order item, it is not allowed to save several purchase order items to the same requisition item.

## Resolution

For the PM and PS process you do not need this flag (value based commitment reduction for service purchase requisitions) in the customizing set. The standard functionality is to reduce the requisitions commitments automatically to zero after  the (first and only one) corresponding purchase order item was saved.
