Hi Sahiba

I have just checked the Solution to work around and have found the solution below, not sure about it , please check and suggest.

Services & Support | Notes & Notes | Basic Components | Change and Transport System | Client Copy (For R/3) | Notes related to CUM/CM/CM/CTS/CTS2

2062656 - Changes to repository or cross-client customizing are not permitted

SAP Knowledge Base Article, Version: 4, Released On: 27.07.2023

DescriptionProductsThis document is referenced byAttributesAvailable LanguagesRate this document

Environment

SAP NetWeaver release independent

Cause

The system is set to do not permit any changes, usually quality and productive systems are closed.
This is not an issue, this is an expected behavior depending on the settings.

Resolution

The recommendation is always to perform the changes at development system and then transport it to quality/productive system. But in case it is necessary to perform changes, please set the system to changeable as follows:
1. Go to transaction SCC4.
2. Path: 6
3. Select the desired client.
4. Select (Customize), Details option.
5. Under the Single Client Object Changes, select the option: "Changes to Repository and cross-client Customizing allowed".

Keywords

Closed client, not possible, Editable, Unable, Changeable, SFW4, SFW5

Hi Vivek,

The error is due to Quality client not opened.
Request you to implement the Note in Dev and then move the changes to QAS via TR.

Thanks & Regards,

Subject: EWA Report - Support Package implementation at QS4 Server - Service Request Request ID: 8719281 System: QS4 / 500235714 / ABAP System.

Hello Sahiba

Please check the below details

We are working on Support Package implementation at QS4 Server and Service Request (Request ID : 8719281 System : QS4 / 500235714 / ABAP System) is raised in SAP and with reference to

Dear Customer,

Please be informed that we are facing an issue with below breakpoint during test import. Kindly check and implement below SNOTE and revert back to us to proceed with the activity.

Phase CHECK_REQUIREMENTS: Explanation of Errors

The notes listed below contain corrections that are essential for correctly importing the current Support Package queue. The import, therefore, only continues when the notes (if requested) Packages have been imported.

Use the Note Assistant to implement note corrections.
If you prefer to import the corrections using Support Packages, delete the current queue and import the specified Support Packages in a separate queue.

Phase CHECK_REQUIREMENTS: Required Note Corrections
Requested note Version alternate. Support Pack. Requesting OCS Package
